**Exposys Data Labs
Intern**

I worked as an intern on the domain of web development . I am given the role of frontend developer. The project that I worked is a small scale e-commerce website that sells plants online. I am required to design the web pages and to turn them in to working prototype.

PROJECTS

2021

**Mini Project
Telegram Bot**

Telegram bot that sends the required study materials that are requested by the user.this bot allows user to access different materials required throughout his or her study in the undergraduation.
